

→ MID VOLUME **DP21 [FRANKING SYSTEM]**

DP21

DP21 → A **REVOLUTION** IN FRANKING

→ PROFESSIONAL IMAGE

→ EASY TO USE OPERATING PANEL

→ BUILT IN ELECTRONIC WEIGHING TRAY FOR EXACT POSTAGE EVERY TIME

The DP21 is a revolutionary '2 in 1' franking system which weighs and franks outgoing mail in a single operation. It also offers unrivalled print quality and can store and print several different advertising slogans. In addition, the DP21 features a host of accounting functions that permit 'intelligent' management of franking costs.

A '2 in 1' franking system which weighs and franks

The DP21 is a complete franking system with its own built-in weighing tray, enabling outgoing mail to be weighed and franked in one operation.

One machine, one keyboard, one control screen

The DP21 speeds up the processing of outgoing mail as well as greatly simplifying the operator's job.

How will your business benefit

Improve your productivity – The DP21 processes up to 60 letters per minute, allowing your mail to be processed in a fraction of the time. The sooner your mail can be processed, the quicker it

can be put into the mailstream and reach its destination on time. Your employees will then have more time to spend on other business related activities.

Save on postal costs

Save up to 20% off your postal costs with electronic weighing. Opt for the 3kg integrated platform and the user can weigh and frank in one simple and efficient operation. With the latest postal rates always available, you can ensure the correct postage is applied. Eliminate the over stamping which occurs when you run out of the correct denominations.

Avoid time consuming trips to the Post Office

– No lengthy queues and no running out of postage. Remote re-setting with POSTAGE&PHONE means that in just over a minute, you can fill up your machine with postal funds, without leaving the office.

For further details or a discussion of your individual mailing requirements, contact Franking Machine Company today on 0151 494 2525.
